

Work Begins on Hwy US-77 (Broad Street), 5th to 10th Streets

Work is scheduled to begin March 30th on US-77 from 5th to 10th Streets in Fremont.

The work will consist of the re-configuration of the intersection at Military Ave., concrete pavement repairs, milling the existing surface, placement of new asphalt and pavement markings, the replacement of some traffic signals, and ADA improvements to the sidewalk ramps through-out the project. Tab Construction of Omaha, Nebraska is the contractor on this \$1 Million project.

The Contractor plans to begin work in the north bound lanes of Hwy US-77 (Broad Street). Once complete, they will move to the south bound lanes.

Due to the nature of this work, it will be necessary to temporarily close some existing streets & lanes, as well as limit, if not temporarily eliminate, turning movements at some locations.

Tab and the Department of Roads, will work with traffic to provide safe, yet effective routes through the project. Notification of traffic constraints will be made thru the use of message boards and the local media as far in advance as possible.

It is the Department of Roads and Tabs' desire to complete this work with a minimal amount of inconvenience to the public. However, some inconvenience will be unavoidable.

Local access will be maintained for businesses and residents along the project throughout the duration of the project.

The Department of Roads Project Manager for this project is Micky Jacobs from the Fremont office.
